Reference Letter for Aryeh Gottesman

To whom it may concern:

This is a reference letter on behalf of my Student Aryeh Gottesman who attended my course for Software Development during the period from April 2015 until December 2015.

I was the instructor for the entire course and I have more than 15 years of practical experience in the field. I attempted to teach the best mix of technologies and concepts needed to begin a career as a Software Developer today and I'm happy with what we have achieved as a class.

In this course we covered all the basic topics of software development such as web programming, database programming, and object oriented programming and android app development in a very hands-on and practical manner.

Aryeh Gottesman has shown himself to be an intelligent and diligent student and has absorbed the course material well. I believe that he will be a good addition to any software development team and will add a lot of value to your organization.

I am available to answer any questions you may have about our school, teaching methodology, and the performance of Aryeh Gottesman as a student and can be reached using the contact information above.

With kind regards,

David Rappoport
